

GT Members Skills & Hobbies Database Questionnaire

At the Members Meeting held in August 2010, there were proposals to have several databases, in the "Members" area, on the Association's website. A small team volunteered to carry forward with these proposals and to start constructing these databases for use by the membership. The two databases outlined below were considered the ones to start with and is dependant on the following voluntary information forthcoming from the membership:

Each participating member is asked to complete a separate questionnaire.

Surname:

Forename:

Email:

Tel no:

1. **Professional Skill(s)** Useful professional skills which you have and you would let other members utilise for advice. Such things as accountants, tax experts, school teachers, broadcasting, etc. Your professional skills will become outdated the further you move into retirement and the professional information associated with these skills may become obsolete. It is therefore your decision whether you feel confident to include your professional skill(s) on this database.

Profession Skill	No of years Practised	Year Started	Year Finished

2. **Hobbies** Listing your hobbies below in order of importance to you. This will allow like minded members to get together to enjoy their hobbies, i.e. cycling, sewing, boating, fishing, acting, etc. you can put down as many hobbies as you like and this will give a greater range of hobbies for members to choose from. It could even start new events within GT and make the monthly programme more varied.
